Subject: Re: Fw: Great Basin under CARB as PQAO

Here is my understanding. Meredith, is this correct?

ARB should be the PQAO

Great Basin is Reporting/Analyzing/Collecting

Hi,

Should Great Basin not be it's own PQAO? I was under the impression that the way monitors are set up in AQS is correct. Could I ask for your input?

Thanks!

Fletcher and Hien -

I don't know if you both have discussed Hien's question.

Great Basin shows PM data under its own reporting organization. This district did not become its own PQAO, so could you reprogram AQS (AMP 255 in particular) to reflect this fact?

For a number of monitors, Great Basin is both the reporting organization and the PQAO (as well as the analyzing and collecting agency.) These can be changed in AQS, and so would update whatever you see in the AMP255/Data Quality Indicator. I can help you through the PQAO agency role change, but I just want to be sure that what is in AQS reflects what you are doing.

Attached file contains all monitors in California. I have hidden those that do not pertain to CARB or another APCD. Highlighted in lines 3209 - 3252 are all the monitors that have the PQAO of Great Basin. Also highlighted in different colors are 81101/PM10 total STP, 85101/PM10 LC and 88101/PM2.5 LC.

Should the PQAO for the PM monitors be CARB? Should this PQAO be in effect for all monitors, not just the PM?

Should the reporting agency be Great Basin or CARB? What about the collecting and analyzing agencies?

Angie, here is a retrieval for all CA monitors listing the agency roles assigned:

PQAO, COLLECTING, REPORTING, and ANALYZING

Filtering on Great Basin shows some monitors with Great Basin as the PQAO, and some with CARB. Should all monitors with reporting agency = Great Basin have the PQAO assigned as CARB? Or just PM monitors?
